

Temporal Hand Labanotation

Old HL stores framewise states. Temporal HL stores a segment object (G, M) and a deterministic repair map.

Old HL

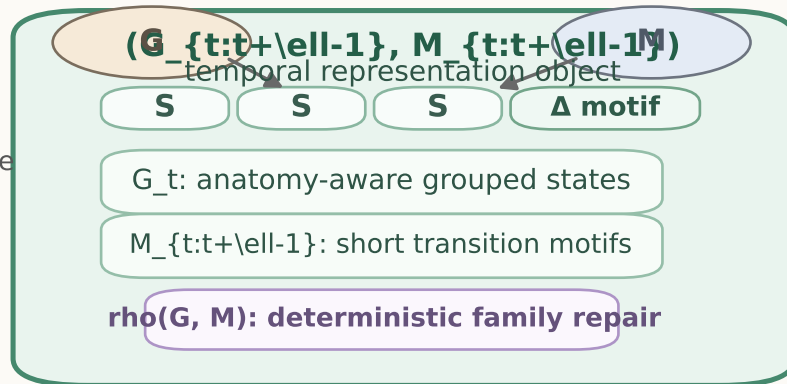

framewise flat state vector x_t

upgrade

Temporal HL

segment object (G, M) + repair operator

validate

Representation gains

evidence focuses on representation behavior

Structure

flat	grouped	delta
0.692	0.897	+0.205

Locality

symbolic	vs	proxy
0.355	0.085	0.095

Temporal gain

hard slice	0.025 to 0.181
chunk	0.703 to 0.779
